

TORN: The Contract — Admin Dashboard Product Sheet

Admin Dashboard Goal

The admin dashboard should be the **control center** for The Contract. It should immediately answer:

What contract is running, how is it performing, who is participating, are there any issues, and what needs admin attention?

The dashboard should prioritize **active contract management, participant activity, objective verification, rewards, and system health**.

1. Platform Statistics

A top-level KPI row showing the overall health and usage of The Contract.

Total Registered Users

12,482 All players who have ever registered on The Contract.

Active Users

1,284 Users who have recently accessed or interacted with the platform.

Active Contractors

482 Players currently participating in the active contract.

Contracts Completed

1,847 Total contracts completed since launch.

Total Rewards Distributed

\$4.82B Total value of cash, items, and other rewards distributed.

2. Current Contract

This should be the primary section of the admin dashboard.

Contract #1847

STANDARD • ACTIVE
One contract. Ten objectives. One winner.
Status ACTIVE
Time Remaining 17:39:45
Participants 482
Started Oct 7, 2026 — 12:00 AM
Ends Oct 8, 2026 — 12:00 AM
Winners 1
Prize \$10,000,000 + 1x Xanax
Primary actions: Manage Contract View Live Contract

3. Contract Controls

Admins should be able to control the active contract directly.
Primary Controls
Start Contract — Launch the scheduled contract.
Pause Contract — Temporarily stop contract progress.
Resume Contract — Continue a paused contract.
Extend Contract — Increase the remaining duration.
End Contract — Manually end the active contract.
Cancel Contract — Cancel the contract completely.
Invalidate Contract — Mark the contract as invalid because of an issue.
These actions should require confirmation, especially destructive actions.

4. Contract Creation

A dedicated section for creating upcoming contracts.

Create Contract

Admin can configure:

Contract Name Contract #1848

Contract Type - Standard - Top 3 - Top 5 - Top 10 - Everyone

Start Date / Time Oct 8, 2026 — 12:00 AM

Duration 24 Hours

Maximum Objectives 10

Objective Selection - Random - Manual - Hybrid

Reward Configuration Cash, items, Xanax, points, or other configured rewards.

Create Draft Save as Template Schedule Contract

5. Objective Management

This should be one of the most important admin sections.

Objective Library

Show all objectives available for random selection.

Use 1,500 Energy — Energy — Medium — Active

Fly to Switzerland twice — Travel — Hard — Active

Lose 5 attacks — Combat — Easy — Active

Defeat a player 5+ levels above you — Combat — Extreme — Active

Complete 3 crimes — General — Easy — Active

Admin actions: Add Objective Edit Objective Disable Objective Delete Objective Test Verification

6. Objective Configuration

Each objective should have its own configuration page.

Example

Objective Fly to Switzerland twice

Category Travel

Difficulty Hard

Target 2 flights

Verification Method TORN API / Event Verification

Status Active

Eligible for Random Selection Yes

Objective ID OBJ-024

Admin should also be able to define:

- Required value
- Minimum/maximum threshold
- Verification logic
- Required API data
- Expiry rules
- Objective weight
- Difficulty
- Availability

Whether it can appear in consecutive contracts

7. Objective Verification Monitor

A real-time view of objective verification.

Verification Queue

PlayerA — Use 1,500 Energy — ☐ Verified — 2 sec ago

PlayerD — Fly to Switzerland x2 — ☐ Checking — 5 sec ago

PlayerB — Lose 5 attacks — ☐ Verified — 8 sec ago

PlayerC — Defeat level +5 player —  Error — 12 sec ago

Statuses: ☐ Verified ☐ Processing ☐ Pending ☐ Failed  Verification Error

Admin actions: Retry Verification Manually Verify Reject Completion

8. Live Participants

A real-time view of everyone currently participating.

Active Contractors

482 Participants

#1 PlayerA — 9/10 — 10 sec ago — Active

#2 PlayerD — 9/10 — 31 sec ago — Active

#3 PlayerB — 8/10 — 1 min ago — Active

#14 PlayerC — 6/10 — 2 min ago — Active

Filters: All Active Inactive Completed Suspicious Verification Error

9. Participant Details

Clicking a player should open their complete contract activity.

PlayerA

Contract #1847

Progress: 9/10

Current Rank: #1

Status: Active

01 ☐ Use 1,500 Energy

02 ☐ Fly to Switzerland twice

03 ☐ Lose 5 attacks

04 ☐ Defeat a player 5+ levels above you

05 ☐ Complete 3 crimes

06 ☐ Use 5 medical items

07 ☐ Travel to 3 countries

08 ☐ Make 10 successful attacks

09 ☐ Sell an item

10 ☐ Gain 5,000 faction

respect

Also show:
- Verification timestamps
- API verification results
- Completion events
- Suspicious activity
- Manual admin actions

10. Winner Management

A dedicated section for contracts that are close to completion.

Current Leaders
#1 PlayerA — 9/10
#2 PlayerD — 9/10
#3 PlayerB — 8/10

Winner Status
Awaiting Final Verification

or

Verified Winner

or

Reward Distributed

11. Rewards Management

Track everything distributed by The Contract.

Reward Overview
Total Distributed
\$4.82B

Today's Prize Pool
\$10M + 1x Xanax

Pending Rewards
\$17.5M

Failed Deliveries
2

Reward History

#1847 — PlayerA — #1 — \$10M + Xanax — Pending
#1846 — PlayerB — #1 — \$10M + Xanax — Delivered
#1845 — PlayerC — #1 — \$10M — Delivered

Actions:
Issue Reward
Retry Reward
Cancel Reward

12. Contract Archive Management

Admins should be able to manage completed contracts.

Contract Archive

#1847 — Oct 7 — Standard — 482 — PlayerA
#1846 — Oct 6 — Top 3 — 521 — PlayerB
#1845 — Oct 5 — Top 10 — 497 — PlayerC

Admin actions:
View
Edit Visibility
Mark Invalid
Restore

The archive should retain the complete contract configuration and results.

13. Announcements

Admins need a simple way to publish system-wide messages.

Create Announcement

Title
Contract Ending Soon

Message
Only 60 minutes remain.

Type
- Information
- Warning
- Important
- Maintenance

Display
- Dashboard
- Contract page
- All users

Publish Announcement

14. Platform Activity

A global activity stream for administrators.

Live Activity
□ PlayerA completed Objective 10
✕ PlayerD moved into #2
□ PlayerC won Contract #1846

This provides quick visibility into unusual activity and contract progress.

15. System Health

This is important because contract completion depends heavily on external/API verification.

System Health
TORN API — □ Operational
Objective Verification — □ Operational
Database — □ Operational
Reward System — □ Operational
Authentication — □ Operational
Background Jobs — □ Operational
WebSocket / Live Updates — □ Operational

Also display:
API Requests Today — 182,452
Failed Requests — 23
Verification Errors — 7
Average Verification Time — 1.8 sec

16. Alerts & Issues

A dedicated section showing things that need admin attention.

⚠ Admin Alerts

3 Verification Failures
Objective verification failed multiple times.

2 Reward Delivery Failures
Rewards require manual

review.

1 Objective Disabled
An objective was automatically disabled after repeated API errors.

High API Usage
Current API usage is approaching the configured threshold.

Each alert should have:
View
Resolve

17. Suspicious Activity

Because this is a competitive system, admins need visibility into potentially abnormal behavior.

Suspicious Activity

PlayerX completed 6 objectives within 12 seconds.

PlayerY triggered repeated verification failures.

PlayerZ submitted conflicting completion data.

Multiple accounts appear to share identical activity patterns.

Display:
Player
Contract
Event
Risk Level
Timestamp

Actions:
Investigate
Clear
Suspend Contract

18. User Management

Basic account administration.

Users
Total Registered — 12,482
Active Today — 1,284
Active This Week — 3,742
Banned — 14
Suspended — 6

Admin actions:
Search User
View Profile
View Contract History
Suspend
Ban
Restore

19. User Contract History

From the user management section, admins should be able to inspect a player's historical performance.

PlayerA
Contracts Entered: 37
Contracts Completed: 29
Wins: 8
Top 3 Finishes: 14
Completion Rate: 78.4%

Contract History
#1847 — Active — #1 — —
#1846 — Completed — #3 — 4h 11m
#1845 — Completed — #1 — 2h 32m

20. Admin Activity Log

Every important admin action should be recorded.

Admin Logs
Admin01 — Paused Contract — #1847 — 04:21
Admin01 — Disabled Objective — OBJ-024 — 04:08
Admin02 — Issued Reward — PlayerA — 03:51
Admin01 — Extended Contract — #1846 — 03:22

Log actions such as:
- Contract creation
- Contract modification
- Contract pause/resume
- Objective changes
- Manual verification
- Reward actions
- User suspension
- User bans
- System configuration changes

21. Admin Settings

General

- Daily reset time
- Contract duration
- Maximum objectives
- Default contract type
- Registration settings

Competition

- Default number of winners
- Tie handling
- Completion rules
- Leaderboard visibility

Rewards

- Default reward pool
- Reward types
- Reward delivery method
- Manual approval requirements

Verification

- API settings
- Verification interval
- Retry limits
- Failure handling

Notifications

- System alerts
- API failures
- Contract completion
- Reward failures

22. Quick Actions

The top-right or dashboard header should provide frequently used actions.

Create Contract
Manage Objectives
View Participants
Issue Rewards
System Status
Announcements

Suggested Admin Dashboard Layout

TORN: THE CONTRACT — ADMIN			Admin / Settings
