

This is a strong concept for a **daily competitive TORN side-game**. The key is to make it feel like an actual “contract” rather than just another daily mission system.

TORN: The Contract

Core Concept

Every day, every participating player receives the same set of objectives.

Objectives are randomly selected from a predefined pool and can involve different aspects of TORN — combat, travel, crimes, education, items, money, faction activity, etc.

Players have a maximum of 10 objectives per day.

The goal is simple:

Complete the entire contract before everyone else.

Daily Contract Flow

1. Contract is generated

At a fixed daily reset time, a new contract is generated.

Example:

CONTRACT #1847

Complete all 10 objectives.

#	Objective	Reward
01	Use 1,500 Energy	\$500,000
02	Fly to Switzerland twice	\$750,000
03	Lose 5 attacks	\$250,000
04	Defeat a player 5+ levels above you	\$1,000,000
05	Complete 3 crimes	\$350,000
06	Use 5 medical items	\$200,000
07	Travel to 3 different countries	\$500,000
08	Make 10 successful attacks	\$750,000
09	Sell an item through the item market	\$300,000
10	Gain 5,000 faction respect	\$1,000,000

The exact objectives would be randomly selected from the objective pool.

The Important Twist: Same Contract

The competitive advantage comes from everyone receiving exactly the same contract.

If today's contract is:

Fly to Switzerland ×2

Win 10 attacks

Lose 5 attacks

Use 1,500E

Complete 3 crimes...

Everyone has those same objectives.

This makes the competition about:

- Planning
- Resource management
- Game knowledge
- Timing
- Efficiency
- Risk-taking

rather than simply getting lucky with easier objectives.

Winning

Standard Day

1 Winner

First player to complete the contract

Reward: \$10,000,000 + 1× Xanax

Everyone else receives nothing from the final prize pool.

However, individual objectives could still have their own rewards if you want to make partial completion worthwhile.

Multi-Winner Days

This is where your admin-controlled system becomes interesting.

Some contracts can be configured as:

TOP 3 CONTRACT

The first three players to complete the contract receive rewards.

- 🏆 1st — \$10M + 2× Xanax
- 🥈 2nd — \$7.5M + 1× Xanax
- 🥉 3rd — \$5M

Or:

TOP 10 CONTRACT

The first 10 players receive rewards.

This can be displayed before the contract begins, so players know what they're competing for.

Contract Types

I'd actually introduce different contract configurations rather than making every day identical.

Standard Contract

1 winner

First player to finish wins.

Elite Contract

Top 3 winners

First 3 players receive rewards.

Black Contract

Top 10 winners

The first 10 players receive rewards.

Survival Contract

Everyone who completes the contract receives a reward.

This would be useful for particularly difficult contracts.

For example:

Complete all 10 objectives within 24 hours.

Anyone who manages it receives:

\$2M + 1× Special Item

This gives players something to do even when they're unlikely to beat the fastest players.

Objective Pool

This will probably make or break the game.

I'd divide objectives into categories.

Combat

- Win 5 attacks
- Lose 5 attacks
- Defeat a player 5 levels above you
- Defeat a player with higher battle stats
- Achieve 3 critical hits
- Hospitalize 10 players
- Make 20 attacks
- Win an attack without using a temporary weapon

Travel

- Fly to Switzerland twice
- Visit 3 different countries
- Travel to Japan
- Spend 6 hours outside Torn

- Fly using a specific airport

Energy / Items

- Use 1,500 Energy
- Use 5 Xanax
- Use 3 medical items
- Use 5 booster items
- Consume a specific item
- Use 1,000 Energy without overdosing

Economy

- Earn \$5M
- Spend \$2M
- Sell an item
- Buy an item from the market
- Complete a trade
- Make \$1M from item sales

General Torn

- Complete 5 crimes
- Complete 3 missions
- Train 1,000 stat points
- Complete an education course
- Visit a specific location
- Perform a certain number of searches

Faction

- Gain 5,000 faction respect
- Make 10 faction attacks
- Participate in a war
- Donate a specific amount
- Complete a faction-related action

Potentially harder to implement, but very interesting:

Objective Difficulty

I'd give every objective a difficulty rating internally.

Difficulty	Example
 Easy	Complete 3 crimes
 Medium	Use 1,500E
 Hard	Fly to Switzerland twice
 Extreme	Defeat a player 5+ levels above you

Then the daily generator could construct contracts using something like:

4 Easy + 3 Medium + 2 Hard + 1 Extreme

This prevents the RNG from accidentally generating an absurdly easy or impossible contract.

Anti-Abuse Is Extremely Important

Because this is competitive, objectives need server-side verification.

Don't rely on the frontend/userscript saying:

“Player completed objective #7.”

The system should verify completion using TORN data/events.

For example:

```
Player
↓
Performs action in TORN
↓
TORN API / event detection
↓
Contract Server
↓
Verify objective
↓
Mark objective complete
↓
Check 10/10
↓
Determine winner
```

This also gives you an opportunity to prevent people from artificially completing objectives.

The Archive

This could become one of the best parts of the site.

Contract Archive

Contract	Date	Type	Winner	Completion Time
1847	Oct 7	Standard	Anurag	3h 42m
1846	Oct 6	Top 3	PlayerA	2h 18m
1845	Oct 5	Top 10	PlayerB	1h 51m
1844	Oct 4	Standard	PlayerC	5h 07m

Clicking a contract could show:

Contract #1847

Completed: 3h 42m after release

Winner: PlayerA

Participants: 482

Objectives:

- ☒ Use 1,500E
- ☒ Fly to Switzerland ×2
- ☒ Lose 5 attacks
- ☒ Defeat player 5 levels higher
- ...
- ☒ Complete 3 crimes

 **Winner: PlayerA**

Leaderboard

I'd also have a permanent Contract Hall of Fame.

Contract Champions

Player	Wins	Top 3	Contracts Completed	Fastest
PlayerA	28	41	67	1h 42m
PlayerB	21	36	59	1h 51m
PlayerC	17	29	51	2h 03m

This creates a second layer of competition.

Players aren't just competing for today's reward.

They're competing to become:

The best Contractor in TORN.

Admin Panel

Since you want this admin controlled, I'd make the contract system highly configurable.

Contract Settings

Contract status

- Draft
- Scheduled
- Active
- Completed
- Cancelled

Winner configuration

- 1 winner
- Top 3
- Top 5
- Top 10
- Everyone who completes

Reward configuration

```
1st:
$10,000,000
2x Xanax

2nd:
$7,500,000
1x Xanax

3rd:
$5,000,000
```

Objective selection

Admin can:

- Add/remove objectives
- Manually select objectives

- Randomize objectives
- Set difficulty
- Set objective availability
- Set objective requirements
- Set individual objective rewards

Emergency controls

Very important:

- Pause Contract
- Cancel Contract
- Invalidate Objective
- Extend Deadline
- Declare Winner

This protects you if a TORN API change or bug causes an objective to become impossible.

One Change I'd Strongly Recommend

Don't make the individual objectives themselves heavily reward-based.

Instead, make the objectives primarily a path toward the final prize.

For example:

Contract Prize: \$15M

rather than:

Objective 1 = \$500k

Objective 2 = Xanax

Objective 3 = \$1M...

Otherwise someone could complete 7/10 objectives, collect substantial rewards, and simply abandon the competition.

Instead:

Contract Progress

7 / 10 objectives

Contract incomplete

Final reward: \$15,000,000

That makes completing the whole contract meaningful.

You could still have small participation rewards for partial completion if desired.

The Biggest Opportunity

I'd make the tagline something like:

ONE CONTRACT. TEN OBJECTIVES. ONE WINNER.

Or:

Everyone gets the same contract. Only one finishes first.

And the daily page could feel like a classified mission:

 THE CONTRACT

CONTRACT #1847

10 OBJECTIVES

24 HOURS

1 WINNER

Your objectives have been assigned.

CONTRACT STATUS

ACTIVE

TIME REMAINING

17:42:09

YOUR PROGRESS

6 / 10

CURRENT LEADER

PlayerName — 3h 17m

YOUR POSITION

#14

That last piece — live position/rank — could make this much more addictive. As people complete objectives, players can see themselves climbing from #87 → #31 → #12 → #4 → #2, creating urgency without revealing exactly how close the leader is unless you want it.

The concept has enough depth to become a proper TORN companion web app, rather than just a daily challenge page.
