

Dashboard Goal

The dashboard should be the home screen for The Contract. It should immediately answer: How is The Contract doing, what is happening right now, and what should I do next?

The UI should prioritize the current contract, while global statistics and historical performance provide context.

1. Global Statistics

A top statistics row showing the overall activity of the platform.

Total Registered Users

12,482

All players who have ever registered on The Contract.

Active Contractors

482

Players currently participating in an active contract.

Contracts Completed

1,847

Total contracts successfully completed since launch.

Total Rewards Paid

\$4.82B

Total cash/items/rewards distributed to players.

These should be simple KPI cards, similar to the statistics bar in the sample UI.

2. Your Current Contract

This should be the largest and most important dashboard section.

When the user has an active contract

Display:

Contract #1847

STANDARD • ACTIVE

One contract. Ten objectives. One winner.

Then show:

Your Progress

6 / 10

Time Remaining

17:39:45

Current Position

#14

Current Leader

PlayerA — 9/10

And a primary button:

Continue Contract →

3. No Active Contract State

When the user hasn't started/selected the current contract:

No Active Contract

You haven't started today's contract yet.

Show the contract information:

Contract #1847

10 Objectives

18:42:15 Remaining

Prize

\$10,000,000 + 1× Xanax

Start Contract

This should be the strongest CTA on the dashboard.

A secondary option could be:

View Objectives

so users can inspect the challenge before committing.

4. Contract Preview

Before starting a contract, show a compact preview.

Today's Contract

Contract #1847

STANDARD

10 Objectives

1 Winner

Prize

\$10M + 1× Xanax

Participants

482

Time Remaining

17h 39m

This allows the player to make an informed decision before pressing Start Contract.

5. Your Contract Progress

A section to navigation to the contract section and check your progress

6. Your Contract History

Give users a quick snapshot of their personal performance.

Your History

Contracts Entered: 37

Contracts Completed: 29

Wins: 8

Top 3 Finishes: 14

Best Finish: 🏆

Fastest Completion: 2h 14m

View History →

This creates personal progression beyond the daily reward.

7. Personal Statistics

A slightly deeper statistics section.

Your Stats

Statistic	Value
Contracts Started	37
Contracts Completed	29
Contract Wins	8
Top 3 Finishes	14
Objectives Completed	312
Completion Rate	78.4%
Average Completion Time	4h 21m
Fastest Completion	2h 14m

This can eventually support achievements and player profiles.

8. Your Recent Achievements

A small optional section for engagement.

Examples:

🏆 First Contract Win

Won your first contract.

⚡ Speed Runner

Completed a contract in under 2 hours.

🎯 Perfect Run

Completed 10/10 objectives.

🔥 Three in a Row

Finished in the top 3 for three consecutive contracts.

This can eventually become a proper achievement system.

9. Announcements / System Updates

A small dashboard notification area.

Examples:

New Contract Available

Contract #1848 is now active.

Contract Type Changed

Today's contract has 3 winners.

Objective Updated

Objective #7 has been replaced due to a verification issue.

Contract Ending Soon

Only 60 minutes remain.

This keeps important information out of the main contract UI.

10. Platform Activity

A lightweight live activity feed could make the dashboard feel more dynamic.

Live Activity

● PlayerA completed Objective 10

✂ PlayerD moved into #2

✓ PlayerB completed 8/10 objectives

🏆 PlayerC won Contract #1846

This doesn't need to expose sensitive information—just publicly visible competition activity.

15. Navigation From Dashboard

The dashboard should provide clear paths to the main areas:

Contract

Current active contract and objectives.

Archive

Past contracts, winners and results.

Leaderboard

Overall player rankings.

Profile

Personal statistics, achievements and history.
